

How to Customize Product Initials and Update in Shopify

1. Accessing the Tool

- Open your web browser and navigate to <https://bit68developer.github.io/nuniz-initials-tool>.
-

2. Uploading and Customizing the Image

- Once on the site, use the "Choose File" button to upload your product image.
- After the image is uploaded, you will see a preview along with options to customize the initials. Set the initial letters and adjust the font size, X position, and Y position according to your preferences.
- Confirm that the initials appear correctly on the product preview.

Make sure to upload and preview on the same image that is attached to the product variant on the Shopify store.

Upload your image:

Artboard2_268c674a-b...-93ef-53707146b690.jpg

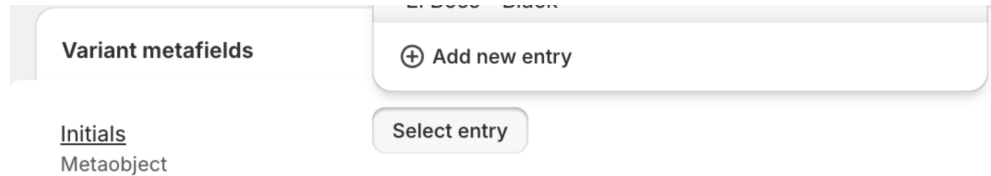

Silver ▾

Initial Letters AB	Font Size 8
X Position 27	Y Position 79

3. Updating the Product Variant in Shopify

- Log into your Shopify admin dashboard.
- Navigate to the specific product, and select the variant you wish to customize.
- Scroll down to the "Variant Metafields" section.

- Click on "Select entry" and then choose "Add new entry".
- In the new entry form, fill out the details:
 - **Name:** Provide a name for this configuration.
 - **Position X:** Enter the X position value you determined in the tool.
 - **Position Y:** Enter the Y position value you determined in the tool.
 - **Font Size:** Enter the font size you set for the initials in the tool.

Add Initials Position

Name *	Display name
<input type="text"/>	
Position X *	
<input type="text"/>	
Position Y *	
<input type="text"/>	
Font Size *	
<input type="text"/>	

- Click on "Save" to apply the changes.

Ensure that all settings are double-checked for accuracy before saving to avoid any misalignments or errors in the product display.
